

Mohamed Ramadan

Software Engineering Student

Abd El-Baky Hussain st, Ezbet El-Nakhel, Cairo, Egypt
<https://github.com/RamadanAnaconda> - rmadanfci20130197@gmail.com
01151735469
Personal details: 22 years old, Single.
Military status : Adiourned

Objective I'm a student about to graduate and looking for a job improves my skills.

Education Faculty of Computers and Information / Cairo University 2017
GPA : 2.5
Bachelor of Software Engineering

- Training and Projects**
- My graduation project is a social media android application in which we use firebase technology and some android APIs.
 - I worked on a project which was a library web application; we developed this web application using Java EE, MySQL, HTML, CSS, JAVASCRIPT and AJAX. I was involved in both the back end and front end development, which made me good in these technologies.
 - I used java in developing some small projects which were to implement (genetic algorithms , neural networks , Artificial Intelligence and others)
 - I used C in developing programming assignments in parallel processing course to practice the parallel programming and the MPI library like (matrix multiplication, shortest path in a graph and others).
 - I used C++ in problem solving which made me understand the language very good and the efficiency of the STL built-in data structures and other tricks. (also used java)

Skills	
Computer Skills	
• OOP	★★★★★★★★★★
• Problem Solving	★★★★★★★★★★
• C++	★★★★★★★★★★
• Java	★★★★★★★★★★
• SQL/MySQL	★★★★★★★★★★
• Android development	★★★★★★★★★★
• Java EE	★★★★★★★★★★
• Html , CSS , JavaScript	★★★★★★★★★★
• Parallel programming using C & MPI	★★★★★★★★★★
• Using Git and Github	★★★★★★★★★★

- Restful APIs and Json

Soft Skills

- Fast Learning
- Self-Study
- using clean code principles
- Working under pressure
- Working in team
- Hard Working
- Creativity

Languages

- Arabic
- English
